Relation of Basel Problem with Omega Contant

by : Samuel Hasiholan Omega Purba, S. Tr. T.

Teknik Elektro

Prodi Teknik Robotika dan Kecerdasan buatan

Politeknik Negeri Batam

$$\frac{Basel\ Problem}{(4 - \pi)} = \pi^2$$

$$Basel\ Problem = \pi^2 \times (4 - \pi)$$

$$Basel\ Problem = \pi^{(-Omega)} \times (4 - \pi)$$

$$(-Omega) = \pi_{\log\left(\frac{Basel\ Problem}{(4 - \pi)}\right)}$$
